## “We effort the limits”

We have reached today through a bottom-to-ceiling progress in production stage by stage. We have colored the ancestral experience passing from father to son with a production experience of approximately twenty-five years.

Supporting our mastery in cutting, bending and metalworking with significant R&D activities, we continue to expand our activities based on the motto “one step ahead every day”.

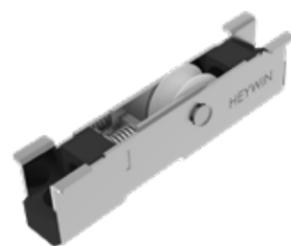

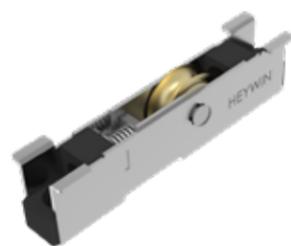

We evaluate planning, production and marketing according to the requirements of the day and aim for maximum benefit. We continue to work determinedly, hoping that the coming days will be even more successful.
